COMPUTER EDUCATION

IT is an integral part of every industry and household. Naturally, there has been huge growth in the number of computers in the market. According to MAIT (Manufacturer's Association of Information Technology) - Ernst & Young study, the Indian hardware industry will reach \$62 billion by 2010

(12 times its existing size!). The employment of computer hardware engineers will increase faster than the average for all occupations through 2010. Translated, this is a big opportunity for professionals who want to work in the hardware industry.
